PROFILE

Final-year Computer Science graduate (Chitkara University) with expertise in Java, C++, and the MERN stack (MongoDB, Express.js, React, Node.js). Experienced in building scalable, responsive, and secure full-stack applications with strong knowledge of data structures, algorithms, REST APIs, and real-time communication. Passionate about problem-solving, performance optimization, and delivering innovative solutions in collaborative, fast-paced environments. Skilled in developing AI-powered and modern web applications with a focus on user experience and practical impact.

EXPERIENCE

AI & Prompt Engineering Experience

Aug 2025 – Dec 2025

Remote

- Developed structured prompts for AI systems to improve response accuracy and workflow automation.
- Worked with LLM-based applications using OpenAI APIs and prompt optimization techniques.
- Built AI-assisted solutions for content generation, summarization, and chatbot interactions.
- Explored Retrieval-Augmented Generation (RAG) concepts and AI integration in web applications.

Organizing Team Member – Coding Blocks CUIET Chapter

2023 – 2024

- Conducted coding workshops using Google Workspace, driving a 25% increase in participant engagement.
- Led event strategy and outreach, expanding the community audience by 30%.

PROJECTS

EventSnap | *Python, FastAPI, React, DeepFace, FAISS, MongoDB, GenAI*

- **AI-Powered Organization Pipeline:** Engineered an automated photo management system utilizing DeepFace and Google Generative AI to accurately detect, classify, and organize faces across thousands of Event Photo.
- **Real-Time Similarity Search:** Implemented **FAISS** vector databases to enable high-performance, real-time face retrieval and matching, significantly reducing search latency for end users.
- **Full-Stack Architecture:** Developed a responsive frontend using React and Radix UI, backed by a high-throughput, asynchronous FastAPI server and secure JWT authentication.
- **Vector Search Integration:** Architected a scalable similarity search solution using FAISS indices, allowing instant querying of similar faces from a MongoDB document database.

AI Resume Analyzer | *MERN + OpenAI*

- Built an AI-powered resume analysis platform using React.js, Node.js, and OpenAI AP.
- Implemented prompt engineering techniques for ATS score analysis and skill recommendations.
- Developed REST APIs for resume parsing and AI response handling.
- Integrated chatbot-style interaction for real-time resume feedback.
- Optimized prompts to improve AI-generated response accuracy and relevance.

Multi-Movies – Movie Discovery Web App | *ReactJs, MongoDB, JavaScript*

- Developed a responsive movie discovery platform using React.js integrated with the TMDB AP.
- Implemented dynamic search, trending listings, pagination, and movie detail pages.
- Optimized API calls and state management for improved UI performance.
- Deployed on Netlify for scalable hosting and public access.

E-Commerce Platform | *MERN Stack, Fast API, React.js*

- Developed a full-stack MERN marketplace enabling users to buy, sell, and request products.
- Built RESTful APIs using Node.js and Express.js for product management and user interactions.
- Implemented image uploads and product request workflows to improve engagement.
- Designed responsive UI using React.js and Tailwind CSS.
- Tested application workflows with 50+ simulated users.

SKILLS

Languages & Frameworks: JavaScript, Python, Java, C++, React.js, Node.js, Express.js

Web & Backend: HTML, CSS, Tailwind CSS, MongoDB, REST APIs, Fast API, WebSocket's

Tools & Platforms: Git, GitHub, Postman, VS Code, Cloudinary, Socket.io

CS Fundamentals: DSA, OOP, DBMS, OS, Computer Networks

EDUCATION

B.E. Computer Science – Chitkara University

2022 – Present

CGPA: 8.06 · Rajpura, Punjab

Class 12 (CBSE) – V.V.M, Ranchi

2020 – 2021

69% · Ranchi, Jharkhand

ACHIEVEMENTS & CERTIFICATIONS

- Participated in competitive hackathons organized by GFG Club and Coding Ninjas.
- IBM Applied DevOps Engineering Certificate — CI/CD, Docker, Kubernetes, Jenkins (Coursera).
- Explored AI application development and prompt engineering workflows using LLM APIs.
